

Sky Tunnel

Commercial Project

Site: Philexcel Business Centre 2 - Philexcel Business Park, CFZ, PHILIPPINES

Task: Reduce energy consumption.

Application: Entrance, Hallways and Toilets.

Solution: 28 x 343mm Rigid98 Tube Kits.

Result:

The hallways and toilets now only use the electrical lighting at night time, largely reducing energy use.

"After the seeing the performance of the Sky Tunnels in our Main Offices, we decided to install more into our Business Centre 2. Again we are delighted with the results achieved and the energy we are saving."

Ian Packham - Philexcel General Manager
